1 x K558PC Magnetic Bracket white polycarbonate

1 x White Plastic Soap dish (mounted K09AW)

Loading figures:

No part of any magnetic installation should be able to withstand a vertically downward force of more than 40KG.

Testing and maintenance: It is an NHS Estates requirement that items suspended on load release support systems should be maintained and load tested in accordance with the manufacturer's instructions on an annual basis. The Yewdale system is maintenance free and its performance remains constant even after repeated use. It is advisable however to carry out a visible inspection of each fitting to identify any possible damage or evidence of tampering. Cleaning is recommended by the use of non abrasive or corrosive liquids. Anti-bacterial sprays and liquids are acceptable.

Safety

Sensitive electronic equipment may be damaged by proximity to a magnetic field and should not come within 15cm of the underside of the brackets. Articles suspended by magnetic systems will come down when pulled! Any load release device by its nature, may cause damage when operated.
